**STATEMENT OF RELEVANCY**

**Reference AO (2001-166938) on Form PTO-1449:**

The patent describes the construction method for building an enterprise system quickly. This method enables system function extension simply and flexibly by sharing and reusing the whole system structure. Claim 1 is similar to our patent in that the framework which define basic attribute and operation is used. But this patent is different from our patent in that it employs only static extension while our method employs dynamic extension.
